

## **Safety Summits**

CAER (Community Awareness Emergency Response) is a non profit public benefit corporation focused on creating a safe and informed public in Contra Costa County.

Safety Sharing Forum Steering Group was formed in 1994 and began discussing lessons learned among facility managers. Group's ambition is to improve facility operations at local plants.

**GOAL** – To succeed in raising the bar on the ability of our industry to work more safely in Contra Costa County.

CAER is honored to be a participant in this effort spearheaded by a partnership among industry and union leaders.

The intentions of these Summits is to choose specific safety topics for discussion each quarter. To develop the topics based on suggestions and priorities that will be set at the previous Safety Summit.

CAER has hosted these Safety Summits since 2000. Today we have completed a total of 24 Safety Summits.

The Safety Summits are held quarterly and usually occur in the months of March, June, September and December. They are held at the Shell Clubhouse in Martinez.
